

TablePress

Tabellhantering

När tabben skapas så väljer man antal kolumner och rader, kan åderas senfe.

En kortkod för tabellen skapas för in klistring på sida.

The screenshot shows the TablePress plugin interface. At the top, there are navigation buttons: "All Tables", "Add New", "Import", "Export", "Plugin Options", and "About". There are also dropdown menus for "Panelinställningar" and "Hjälp".

A welcome message is displayed: "Welcome! Thank you for using TablePress for the first time! If you encounter any questions or problems, please visit the [FAQ](#), the [documentation](#), and the [Support](#) section on the [plugin website](#)." Below this is a link to "Hide this message".

The main content area contains the following text: "This is a list of your tables. Click the corresponding links within the list to edit, copy, delete, or preview a table." Below this is a paragraph: "To insert a table into a page, post, or text widget, copy its Shortcode `[table id=<ID> /]` and paste it at the desired place in the editor. Each table has a unique ID that needs to be adjusted in that Shortcode. You can also click the "Table" button in the editor toolbar to select and insert a table."

The table list is currently empty, showing a message: "No tables found. You should [add](#) or [import](#) a table to get started!"

ID	Table Name	Description	Author	Last Modified
No tables found. You should add or import a table to get started!				
ID	Table Name	Description	Author	Last Modified
